January 17, 2018

Dear Parents and Students,

Maine East High School will be administering an Algebra 2 placement test for all **students currently enrolled in 8th Grade Algebra 2.** The score on this test will help us determine a proper math placement for a student's first year at Maine East. The purpose of this letter is to provide some details about the test.

This year's test will take place at 9:00 am on Saturday, March 10th in the student cafeteria at Maine East High School. Enter the building at Door #3 located at the east bus shelter. The student cafeteria is about 75 yards down the hall on the left side. We ask that your student arrive no later than 8:45 am.

Students have 2 hours 45 minutes to complete the test and may leave early if they finish early. Students should bring two pencils and an eraser. No calculators will be allowed. The test has room for work, so no scratch paper is needed.

The test has a total of 91 free response questions.
Practice problems are posted on the Maine East Math Website.

If a student has an unavoidable conflict on this date, please contact me directly to make an alternative arrangement.

Parents will receive a letter by the end of March indicating their math placement:
Accelerated Geometry & Trigonometry or repeat Accelerated Algebra 2 Freshmen

Thank you in advance for all that you do to ensure a successful testing day.

Respectfully,

Jill T. Sweetwood
Department Chair of Mathematics
Maine East High School
