March 16, 2016

Dear Parents,

We would like to remind you of the Illinois state law regarding the Meningococcal vaccine:

“Beginning with the school year 2015-2016 any child entering the 12th grade shall show proof of having received two doses of meningococcal conjugate vaccine prior to entering the 12th grade. The first dose shall have been received on or after the 10th birthday, and the second dose shall have been received at least eight weeks after the first dose. If the first dose is administered when the child is 16 years of age or older, only one dose is required.”

We have reviewed your child’s immunization records, and according to our records your child is not compliant with the new law. Please contact your child’s physician to schedule an appointment or request written confirmation that your child has received the meningococcal vaccine. If your child has not received the meningitis vaccine prior to August 15, 2016 they will be excluded from school.

If you have any questions please contact Kathy Klein in the health office at 847-692-8317.

Sincerely,

Michael Wartick
Director of Student Personnel Services
